

RUST SOLVENT WITH MOS2

5660-70-25

Product info	Loosens jammed bolts and nuts with excellent creep capability and high capillary action
Type	Other
Manufacturer	Staloc
Colour	Transparent
Description	Loosens rust and prevents further corrosion. The product is used especially when loosening or tightening screws, bolts and nuts. Moreover it is used for breakaway of bowden cables, hinges, ect. The product eliminates moisture, and is therefore suitable for improving current flow and ignitability. Avoids squeaking of shocks, chain drives, mounting brackets ect. in the automotive industry. Releases tar from car paint. Maintains and protects automotive chrome parts. Dry lubrication effect is provided by the additive MoS2.
