

ADHESIVE AND GASKET REMOVER

5660-70-31

Product info	Dissolves hardened adhesive and sealant residue
Type	Spray Can
Manufacturer	Staloc
Description	<p>STALOC adhesive and sealant remover removes (even cured) leftovers of any type of adhesive and sealant. Particular additives contained in the spray provide for a long-term penetration of the solvent. This ensures, that cured, tough layers of adhesives can be dissolved from the substrate. The viscosity of the product has been designed to enable a use on vertical surfaces without running off. Untreated metals will be protected by the contained anti-corrosion additives.</p> <p>STALOC adhesive and sealant remover dissolves sealants, adhesives, oil carbon residues, colours, paint, grease, oil, tar, resin, lubricants and other chemical substances.</p> <p>The product can be used on metal, wood, ceramics, glass, polyethylen and polypropylen.</p>
