

HEAT HOSE PLSX

1460-7X

Product group 140

Inner tube Polyamide

Cover Neoprene

Temperature min. °C -40

Temperature max. °C +135

Media Ventilation

Reinforcement Steel spiral

Applications and characteristics Robust and light ventilation hose for cold and hot air transportation. The hose comes in 7,5 meter lengths with a compression stuffsac, spiral free ends and integrated tightening bands on one side. For transportation and storage, the hose can be compressed and packed in the sewn on stuffsac. The hose cover has sewn on wear strips. The hose comes in dimensions from 203 mm to 1000 mm.

Design Compressible, yellow
