

COPM CHEM LD GAS RETURN

1585-00

Product group	140
Temperature min. °C	-40
Temperature max. °C	+80
Media	Special, Gas and welding
Reinforcement	The standard version has galvanised steel spirals (Z) internally and externally. Also available with spirals of aluminium (A) or polypropylene coated steel spirals, on request.
Applications and characteristics	A Special hose for gas recycling on gas trucks and related industries. The COMP LD hose is 100% aromatically resistant. Electric continuity is attained when the two spirals are put towards the hose's fittings. In this way, static electricity is avoided. The electric resistance in an assembled hose is less than 10 Ohm, according to BS 5842:1980 § 6.2. Supplied in 40m coils. Vacuum = 70%
Design	Orange
